

Stones and Bones

Year 3 Summer 2021

What you can do at home to help:

Kendal Museum has a great collection of local Stone Age artefacts. Why not plan a visit?

Please continue to support the children with their homework projects.

Involve the children in planning, preparing and cooking healthy meals at home.

Vocabulary we will use:

neolithic, prehistoric, nutrients, nomadic, hunter gatherer, settlement, natural resources

Enterprise

We will be planning a very special visit together
(more details to follow!)

Learning Skills

We will be reflecting and showing resourcefulness as we make connections between our lives and those of people from history.

Values

fellowship, friendship, peace, reverence, trust.

Global Learning

We will be looking at what we can learn about sustainability from people of the Stone Age.

- As **writers** we will be learning how to structure a story, how to describe settings and characters. We will be using a range of sentence structures and a variety of punctuation.
- As **readers** we will be enjoying a range of stories about the Stone Age, comparing their content and style.
- As **mathematicians** we will be learning about fractions and measurement, especially time. The children will continue to develop their use of written strategies for all 4 operations.
- As **scientists** we will be looking at human and animal skeletons and thinking about what living things need to stay healthy. We will compare and contrast our diets with that of hunter gatherers from the past and present day.
- As **historians** we will be thinking about what life was like in Britain in the Stone Age. We will be examining how lives changed as farming began and metal was discovered.
- As **artists** we will be looking at cave art around the world and using a range of techniques to paint our own. We will also be developing our drawing skills.
- As **designers** we will be learning to plan meals to cook on a camp fire. We will use a range of materials to make tools.
